

The MATRIX-System
Form Adapting Support Technique

T-slot profile plate with grid holes

New Interface

The New MATRIX Plate comes with grid.

The well proved MATRIX plate ist with grid holes as an option.

Reproducing the setup of fixtures for a work piece with indexing, the new MATRIX grid plate makes exact working possible.

Integrated boreholes allow exact reproduction of severals setups holding complicated work pieces in measurement industries.

Like all MATRIX products, the MATRIX grid plate comes with the typical MATRIX advantages

- Screw in pins with only one tool
- Quicker repeatable setup with integrates grid holes
- compatible to all MATRIX modules
