

The MATRIX-System
Form Adapting Support Technique

X-Adapt - Replacement pin jaws for machine vices

The Advantages of X-Adapt:

- Perfect, form-fitted fixing of the work piece
- Pins are driven pneumatically or with coolant onto the work piece.
- Insensitive to dust, dirt or splinters due to flow of supplied air or coolant
- Suitable for machine vices from all manufacturers

Positioning, Holding, Clamping

Typical areas of application:

- Aviation industry
- Automobile industry
- Form casting
- Building of prototypes
- Working with profiles
- Medical technology
- Production of sanitary items
- General engineering
